ABSTRACT

An attempt to project the 1[illegible] total Ontario population for each municipality in each county and district was made to provide some guidelines in projections of school enrollment, especially in those areas of apparent rapid growth or even of decline in total population. The process followed was the preparation of a preliminary estimate of the 1981 population for each county and district, on the basis of past trends, with special reference to recent changes, using the census population values from 1921 to 1976 as the base. The estimate was then sent to the county and district educational authorities with the request that they consult the local municipal authorities and send back any revisions deemed necessary, with explanations where possible, such as opening of new subdivisions. These suggestions were considered and the final tables prepared and included in this report. (Author/MLF)

Sixty Years of Population Growth in Ontario, 1921 to 1981

One of the background studies conducted last fall was an attempt to project for each municipality in each county and district in the province the total population which might be expected in 1981. The purpose, of course, was to provide some guidelines in projections of school enrolment, especially in those areas of apparent rapid growth or even of decline in total population. The method used was to project on the basis of past trends, with special reference to recent changes, using the census population values from 1921 to 1976 as the base.

The actual process was an iterative one, similar to that which the senior author used in Nova Scotia, namely, to prepare in the Commission offices a preliminary estimate of the 1981 population for each county and district, to send the complete copy to the educational authorities with the request that they consult the local municipal authorities and send back to us any revisions they deemed necessary, with explanations where possible (e.g. opening of new subdivisions, etc.). We studied these suggestions very carefully, and then prepared the final tables included in this Statistical Appendix.

Readers will observe that actual declines in total population are anticipated in some regions, particularly in parts of northern Ontario, but generally the pattern is one of modest growth. The major exceptions, where there may be substantial growth in population during the next few years, are for the most part adjacent to the metropolitan areas of southern Ontario. These include Dufferin, Durham, Halton, Middlesex, Ottawa-Carleton, Peel, Simcoe, Victoria, Waterloo, Wellington, and York (excluding Metro Toronto).

As indicated in the first Interim Report, an understanding of these uneven growth patterns is essential in planning for education as well as for other municipal services. There are very significant intraprovincial

DEC 12 1980

shifts in population, of all age groups: e.g., from the city of Ottawa to Carleton, and from the Metro Toronto complex to nearly all the surrounding counties (somewhat less to the east, as it happens, since Scarborough itself is not completely built up north of the Macdonald-Cartier Freeway. The sixty years patterns of growth are fascinating for some of the municipalities, with large swings up and down over the years - but generally up except for boundary changes.

It is hoped that the municipal authorities, as well as the education authorities, will find these statistics useful for planning purposes.

We wish to acknowledge the inevitable assistance provided by Miss Shadia Haddad in the preparation of these tasks.
